Re Leachate Lateral movement wells at Yorkhouse (Callahan
Park) site

Dear Tom,

Enclosed herewith is a proposal from Henry Boysen Company outlining two proposed methods of building the aforementioned wells. I have no problem with using the second proposal at a cost of \$3380.00 per well site because it accomplishes the same result. The big difference was the length of the screens. We were told that the screens come in 3 foot increments and based on our design on that module. In talking to George Gaffke, he said that module is only for screens that are driven with a well point rather than on a dug or augered well.

I spoke to Howard Chinn last Friday asking him if the place I submitted on July 1 was satisfactory and he said that he had not sent it to the EPA but it seemed to be satisfactory from his viewpoint. I will continue to inquire at appropriate time intervals to keep our line of communication open with the Attorney Generals Office.

I trust that the foregoing is satisfactory for your purposes and I would like an approval to allow the contractor to order his materials.

Professionally yours,

Frank J Furlan
